1	Scope of Work Pg no. 188	Section-V Cl. No. 3.1.7	VPS Hosting Requirements	During pre-bid meeting of the tender, it was specified that the operating system of the proposed VPS Hosting will be Windows, but as per the section, 3.1.7 of the tender document, it is specified as "The VPS shall operate on a Linux and Apache environment with full PHP and MySQL database support.". This confusion prevents us from doing correct cost estimation of VPS hosting.	<p>Tender condition shall prevail.</p> <p>"The VPS shall operate on a Linux and Apache environment with full PHP and MySQL database support."</p> <p>Since the website will be hosted on WordPress CMS, a Linux-based VPS environment is the correct and intended requirement.</p>

Note: This document shall form an integral part of the bidding document and shall be signed/stamped and submitted along with the bid. Further, the tender document uploaded initially as a part of *Buyer uploaded ATC document* shall remain unchanged.
